

Environment under the Microscope

CANTILLON ENVIRONMENTAL GOLDEN RULES 1 TO 6

No: 1 Preventing Spills

Preventing Spills ✓

- Bund all harmful liquids - 110% bunding for all containers except 25% bunding for single drums
- Spill kits to be available where harmful liquids are being stored on site and personnel trained in their use
- Store harmful liquids such as fuel, away from all drainage systems and watercourses

No: 2 Handling of Waste

Handling of Waste ✓

- In England and Wales, register site with Environment Agency
- In Scotland, notify SEPA at least three days before hazardous waste is removed from site

No 3 Correct Waste Management

Correct Waste Management ✓

- Waste must be transported only by a registered carrier, be disposed of at a licensed site and must be accompanied by the appropriate documentation.
- For general waste this will be a Waste Transfer Note. For Hazardous/Special waste, a Consignment Note is required. These original documents must be kept on site for two and three years respectively.

No: 4 Prevent Damage to Wildlife and Sensitive Areas

Prevent damage to wildlife and sensitive areas ✓

- Liaise with client and environmental authorities to ensure all appropriate control measures have been identified.
- Ensure these control measures are in place and communicated to all on site at induction and throughout the contract

No: 5 Prevent Nuisance

Prevent Nuisance ✓

- Keep dust to minimum, damp down
- Keep noisy operations to a minimum
- Don't burn anything on site

No: 6 Reduce, Re-use and Recycle

Reduce, Re-use, Recycle ✓

- Arrange for separate waste, recycling skips where possible and label Skips
